

## WHY CHOOSING SUEZ AS PARTNER?

# Differences that sustain your performances

### High yield:

2000 à 3000 m<sup>2</sup>/hour/machine

Possibility of using **3 machines simultaneously**

**Optimal rubber removal quality:** Reach excellent friction values that meet ICAO or DGAC requirements

Long-standing expertise in high pressure cleaning

**ISO 9001 certification, STAC certification**

**conserving and managing water resources** as well as handling waste to ensure the **traceability of all solid waste from collection to final disposal**

**expert teams, organisational rigour,** constant runway monitoring

**short operations time frames:** less than 24h in France in case of emergency

**0 accident on airports** since the rubber removal activities began

RODECO GROUP EXCLUSIVE DISTRIBUTOR IN ITALY

# Ensure the grip of your runways

- RUNWAY RUBBER REMOVAL
- PAINT REMOVAL
- FRICTION MEASUREMENTS

SUEZ, YOUR BENCHMARK PARTNER FOR RUBBER REMOVAL

# Because the grip of your runways is a major component of users safety

### TAKING ACTION FROM A TO Z

SUEZ is a technical expert in rubber removal and takes action on **all your project's value chain** to guarantee functional measurements defined by the relevant authorities **ICAO** or **DGAC**:

- friction measurements
- water pressure rubber removal
- removal of surface markings
- removal of grease marks from airport aprons
- rubber removal with complete waste traceability

### MORE THAN 20 DEDICATED EXPERTS

- only water pressure rubber removal specialists
- trained in safety and equipment
- speaking multiple languages (master english, spanish, italian and german)

#### The SUEZ advantage

An intervention within

# 24h

is possible in case of emergency

THE 4 KEYS STEPS TO SUPPORT YOU

# SUEZ is by your side all along your project

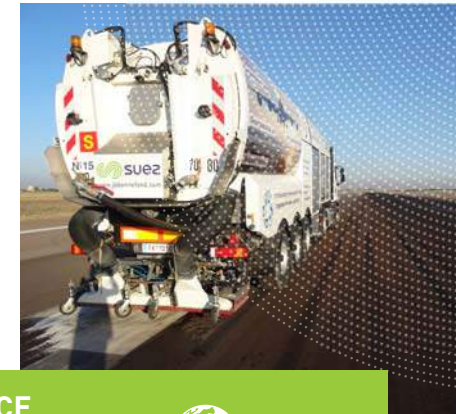

- 1 RIGOROUS PREPARATION BEFOREHAND**
  - an on-site visit from our airport services manager
  - assess starting friction coefficient values
  - transport the equipment to the site
- 2 PROFESSIONAL RUBBER REMOVAL OPERATIONS AND QUALITY MONITORING**
  - taking a full array of measurements and analyzing the results
  - create a grid to cover the areas to be treated
  - pressure cleaning and feed-back on a test zone
  - complete runway rubber removal process
  - grip measurements
  - remove and processes the waste collection and treatment
- 3 CERTIFICATION OF ALL OUR WORKS**
  - delivery of an operation report and a certificate of compliance for the runway
- 4 POST-OPERATIONAL "UPKEEP AND INSPECTION"**
  - inspection and maintenance contract allows for runways to be continually monitored and for future rubber removal operations to be planned in advance

#### The SUEZ advantage

# 1 SUEZ EXPERT

monitors the rubber removal project throughout the operation

THEY TRUST US  
IN FRANCE AS  
ABROAD

## CAMEROON

Friction measurements in Douala's Airport

**The SUEZ advantage**  
reactivity and compliance

- 2 days
- 1 technician
- 1 runway
- 1 certification

## MOROCCO

Rubber removal from runways in Agadir, Tangier, and Casablanca

**The SUEZ advantage**  
optimum speed

- 8 nights
- 3 airports
- 3 technicians
- 116,000 m² of pavement cleaned

## IVORY COAST

Annual maintenance contract in Abidjan

**The SUEZ advantage**  
long-term reassurance with a monitoring contract

- 3 technicians
- 1 runway
- 28,000 m² of pavement cleaned

## FRANCE

Emergency rubber removal in Lyon Saint-Exupéry

**The SUEZ advantage**  
recognised and approved experience

- 1 night
- 2 machines
- 5 technicians
- 36,000 m² of pavement cleaned
